Medical Disclaimer

Please Note: The recommendations in this and any other document are not medical guidelines but are for educational purposes only. You must consult your physician prior to starting this or any other program or if you have any medical condition or injury that can possibly worsen with physical activity. This program is designed for healthy individuals 18 years and older only. The information in this document is meant to supplement, not replace, proper exercise training.

All forms of exercise pose some inherent risks. Marc “Funk” Roberts, or anyone associated with Funk Roberts Fitness Ltd advises readers to take full responsibility for their safety and know their limits. Before partaking in the exercises in this or any other program, be sure that your equipment is well maintained, and do not take risks beyond your level of experience, aptitude, training and fitness. The exercises and dietary programs in this book are not intended as a substitute for any exercise routine or treatment or dietary regimen that may have been prescribed by your physician. Don’t lift heavy weights if you are alone, inexperienced, injured, or fatigued. Don’t perform any exercise unless you have been shown the proper technique by a certified fitness trainer or certified strength and conditioning specialist. Always ask for instruction and assistance when lifting. Don’t perform any exercise without proper instruction.

Always do a warm-up prior to any exercise including but not limited to interval training. See your physician before starting any exercise or nutrition program. If you are taking any medications, you must talk to your physician before starting any exercise program, including but not limited to Funk Roberts Fitness. If you experience any light-headedness, dizziness, or shortness of breath while exercising, stop the movement and consult a physician immediately. You must have a complete physical examination if you are sedentary, if you have high cholesterol, high blood pressure, or diabetes, if you are overweight, or if you are over 30 years old. Please discuss all nutritional changes with your physician or a registered dietician. If your physician recommends that you don’t use this or any other program, please follow your doctor’s orders.

Waiver & release of liability

(READ CAREFULLY BEFORE PERFORMING ANY EXERCISES IN THIS MANUAL)

I FURTHER AGREE TO RELEASE, INDEMNIFY AND HOLD FUNK ROBERTS FITNESS, OR FUNK ROBERTS FROM ANY LIABILITY WHATSOEVER FOR FUTURE CLAIMS PRESENTED BY MY CHILDREN FOR ANY INJURIES, LOSSES OR DAMAGES

Introduction

Hey Brother

Welcome to a journey that promises to enrich your life in ways you may not have imagined.

As men over the age of 40, we often encounter a crossroads of introspection, seeking not just to maintain our health and vigor but to deepen the sense of meaning and peace in our lives.

This 21-Day Mindful Meditation Challenge is a portal to discovering an enhanced version of yourself, and I am here to guide you every step of the way.

As you embark on this path, remember that meditation is not a race, but a walk in nature where every step brings a new sight. It is my honor to walk with you as you explore the landscapes of your inner world. Let us begin this transformative journey together.

Overview of Mindful Meditation

Mindful meditation is the art of being present. It's about anchoring ourselves in the 'now,' learning to observe our thoughts, emotions, and sensations without judgment.

Unlike other forms of meditation that require specific postures or mantras, mindfulness is about awareness. It is a simple, secular practice that can be integrated into any lifestyle or belief system.

At its core, mindful meditation is a practice of focus and release. We focus on an anchor—often our breath—and when we notice our mind wandering, we gently release the distraction and return to our point of focus.

This process, while simple, can be profound. Over time, it cultivates a sense of calm and clarity, helping us to respond to life's challenges with a sense of equanimity.

Benefits of Meditation for Men Over 40

For men over 40, the benefits of meditation are particularly resonant. This stage of life often brings with it the wisdom of experience and the clarity of perspective. Yet, it can also be a time of reflection on physical changes and life's impermanence. Meditation offers numerous benefits that address both the psychological and physiological shifts that occur:

- **Stress Reduction:** Meditation has been shown to lower cortisol levels, the hormone associated with stress.
- **Improved Focus and Concentration:** Regular practice enhances cognitive function, which can counteract the natural decline in these abilities that may occur with age.
- **Emotional Health:** It increases self-awareness and promotes a healthy attitude towards life's ups and downs.

- **Enhanced Physical Health:** There's a correlation between mindful practices and reduced blood pressure, improved sleep patterns, and a stronger immune system.
- **Hormonal Balance:** Meditation can play a role in balancing testosterone levels, which can impact energy, mood, and overall vitality.

As you progress through your 40s and beyond, embracing mindfulness can act as a powerful tool to navigate this phase of life with grace and strength.

How to Use The 21 Day Meditation Challenge and Guide

This guide is your companion, designed to ease you into the practice of meditation with structure and flexibility. Here's how to make the most of it:

Daily Practice: Set aside a consistent time each day for your meditation practice. Morning or evening, find a time that works for you and commit to it.

Daily Emails: When you are ready to start the 21 Day Challenge you will need to activate the daily emails that will guide you through your journey with valuable information, tips and strategies to learn and optimize your meditation while providing you a link to the guided meditation session of the day

Guided Audio Sessions: Speaking of guided session, you will use the provided audio tracks to guide your sessions. They have been crafted to build upon each other, gradually enhancing your skill and depth of experience.

Reflective Journaling and Worksheet: After each week of meditation, take a moment to journal any thoughts, feelings, or insights that arose. This reflection is a crucial part of the process.

Engage with the Over 40 Brotherhood Facebook Group: If you have questions or wish to share your experience, use our O40A Brotherhood Tribe platform to connect with others on the same path.

Be Patient with Yourself: Some days will be easier than others. Meditation is a skill, and like any skill, it requires practice and patience to develop.

As we proceed, remember that this challenge is not just about the time you spend in meditation; it's about learning to carry mindfulness into every aspect of your day. Welcome to the beginning of your mindful journey.

Get It Done!

Funk

Special Focus: Testosterone and Hormonal Balance

Introduction

Testosterone, the primary male sex hormone, plays a critical role in men's health, affecting everything from libido and muscle mass to mood and energy levels.

After the age of 40, men typically experience a gradual decline in testosterone levels, a natural process called andropause or male menopause.

This decline can have significant effects on health, leading to changes that affect physical, mental, and emotional well-being.

Understanding Testosterone Decline

Testosterone levels peak in adolescence and early adulthood, and by the time men hit 40, they can expect a decrease of about 1% per year. This reduction can lead to various symptoms that can impact quality of life, including:

- Reduced muscle mass and strength
- Increased body fat, particularly around the abdomen
- Fatigue and decreased energy levels
- Lower sexual desire and fertility
- Changes in sleep patterns
- Decreased bone density
- Mood swings and irritability
- Cognitive changes, such as difficulty concentrating.

While this decline is natural, certain lifestyle factors can exacerbate the reduction in testosterone, including poor diet, lack of exercise, alcohol consumption, and stress.

The Role of Stress in Hormonal Imbalance

Chronic stress is a prevalent concern for men over 40, often juggling professional responsibilities, family life, and social obligations.

Stress triggers the release of cortisol, known as the “stress hormone,” which, in high levels, can lead to numerous health issues, including hormonal imbalance.

Elevated cortisol can negatively affect testosterone production, creating a hormonal environment that can exacerbate the symptoms of low testosterone.

How Meditation Can Help

Meditation is a powerful tool for managing stress and has been shown to lower cortisol levels in the body.

By activating the body's relaxation response, meditation can help counteract the effects of stress and promote hormonal balance. Here's how meditation can be particularly beneficial for testosterone levels and overall hormonal health:

- 1. Reducing Cortisol:** Mindfulness and meditation practices can decrease cortisol production, helping to alleviate its suppressive effect on testosterone. A [study from Thailand](#) showed that daily meditation reduced blood cortisol levels by 20%, while research from UC Davis found that meditators experienced nearly a 50% reduction in cortisol levels. Additionally, a meta-analysis confirmed the beneficial effects of meditation interventions on cortisol levels.
- 2. Enhancing Sleep Quality:** Meditation can improve sleep quality and duration, which is essential for the production and regulation of testosterone. A [randomized clinical trial](#) conducted at a medical research center among older adults with moderate sleep disturbances showed that a mindfulness meditation intervention, called Mindful Awareness Practices (MAPs), resulted in significant improvements in sleep quality. Participants in the MAPs group experienced a marked improvement in their Pittsburgh Sleep Quality Index (PSQI) scores from baseline to post-intervention compared to those in a sleep hygiene education (SHE) group, with the MAPs intervention proving superior in enhancing sleep quality and reducing sleep-related daytime impairment.
- 3. Improving Mood:** Regular meditation can improve mood and reduce the prevalence of negative emotions, supporting a healthier hormonal milieu. A [study published on PubMed](#) investigated the effects of a brief, daily meditation practice on non-experienced meditators aged 18-45 over 8 weeks. The results showed that 8 weeks of a 13-minute daily guided meditation session decreased negative mood states and anxiety scores, enhanced attention, working memory, and recognition memory compared to a control group engaging in podcast listening. The study concluded that even short daily meditation practices could have similar behavioral effects as longer and more intensive meditation practices, particularly in improving mood and emotional regulation.
- 4. Lowering Blood Pressure:** Meditation has been associated with lower blood pressure, which can help in maintaining cardiovascular health, essential for testosterone production. A [meta-analysis of randomized clinical trials](#) assessed the impact of

meditation on blood pressure. It examined nineteen studies and found that non-transcendental meditation interventions had a statistically significant effect on lowering systolic and diastolic blood pressure (SBP and DBP). Specifically, non-transcendental meditation was associated with a reduction in SBP of -3.77 mmHg and a reduction in DBP of -2.18 mmHg, indicating its potential as a promising approach for lowering blood pressure.

Incorporating Mindfulness into Daily Routines

To optimize hormonal health, incorporating mindfulness into your daily routine is key. Here are some tips for integrating mindfulness practices into everyday life:

- **Start Your Day Mindfully:** Begin with five minutes of meditation each morning. Focus on your breath and set a positive intention for the day.
- **Mindful Eating:** Pay attention to the flavors, textures, and sensations of eating, which can improve digestion and promote a balanced diet.
- **Take Mindful Breaks:** Throughout the day, take short breaks to breathe deeply and center yourself, especially during stressful moments.

- **Mindful Exercise:** Engage in exercise with full awareness, focusing on the movement and how your body feels, which can increase testosterone levels naturally.
- **End Your Day with Reflection:** Spend a few minutes before bed in quiet reflection or meditation to calm the mind and prepare for restful sleep.

Conclusion

As testosterone levels naturally decline with age, it's essential to adopt lifestyle practices that support hormonal balance. Mindfulness and meditation emerge as powerful allies in this quest, helping to mitigate stress and its effects on the body.

By incorporating these practices into your daily routine, you can foster a hormonal environment conducive to health, vitality, and well-being beyond the age of 40.

Introduction to the 21-Day Mindful Meditation Challenge for Men Over 40

Welcome to the path of rejuvenation and inner peace. This 21-Day Mindful Meditation Challenge is crafted to guide you, a man over 40, 50, 60 and beyond through the transformative power of meditation.

Each day, you will be gently led into a practice that will not only soothe your mind but also fortify your body's natural rhythms, including your hormonal balance.

This journey is about integrating mindfulness seamlessly into your life, harnessing the serene strength that comes from within.

Week 1: Foundations of Mindfulness

Focus and Goal:

This week lays the groundwork for your meditation practice. The goal is to establish a daily routine that nurtures self-awareness and presence.

- **Self-Inquiry and Self Awareness:** Delve into your inner landscape to foster self-discovery and heightened awareness of your thoughts and emotions.
- **Progressive Muscle Relaxation:** Learn to systematically relax your muscles, which can reduce stress and promote a sense of calm throughout your body.
- **Loving Kindness Meditation:** Cultivate compassion towards yourself and others, which can lead to improved emotional well-being and interpersonal relationships.
- **Guided Gratitude Meditation:** Embrace a sense of gratitude, which can enhance positive emotions and satisfaction with life's experiences.

Week 2: Deepening Practice

Focus and Goal:

Build on the foundations of week one by deepening your meditation practice and enhancing your ability to maintain mindfulness amidst daily activities.

- **Release Surrender Guided Meditation:** Practice the art of letting go, surrendering the need for control to find peace in the present moment.
- **Mindfulness Mountain Guided Meditation:** Imagine the stability and grandeur of a mountain to embody strength and perspective in your practice and life.
- **Loving Kindness and Gratitude Revisit:** Deepen the practices of loving kindness and gratitude to nurture your emotional and relational health.

Week 3: Focus on Testosterone and Hormonal Balance

Focus and Goal:

Concentrate on meditations that promote relaxation and rejuvenation, with a focus on supporting testosterone and hormonal balance.

- **5 Senses Guided Meditation:** Engage all your senses in meditation to fully connect with the present, which can help regulate your body's stress response.
- **Education on Hormonal Health:** Learn how mindfulness impacts hormonal health, particularly the balance of testosterone, and how to apply this knowledge daily.
- **Nutrition and Mindfulness:** Explore the interplay between diet, mindfulness, and hormonal health to foster a holistic approach to well-being.

Each day, you'll receive an email with insights related to the day's focus, offering you support and wisdom to carry you through the challenge. Embrace each session with an open heart and a willing spirit and witness the transformation that awaits you.

21 Day Meditation Challenge Breakdown

On average, this mindful meditation challenge sessions each day will take 10-15 minutes. For each day, the total session time is noted. Below you will find the links to all the guided mediation sessions and also the complete 21 Day Meditation Challenge

[Self-Inquiry and Self Awareness Guided Meditation \(10 Minutes\)](#)

[Release Surrender Guided Meditation \(14 Minutes\)](#)

[Progressive Muscle Relaxation Guided Meditation \(11 Minutes\)](#)

[Mindfulness Mountain Guided Meditation \(6 Minutes\)](#)

[Loving Kindness Guided Meditation \(13 Minutes\)](#)

[Guided Gratitude Mediation \(10 Minutes\)](#)

[Five Senses Guided Mediation \(10 Minutes\)](#)

Week 1: Foundations of Mindfulness

Day 1: Self Inquiry and Self Awareness Guided Meditation (Exploring the Inner Self)

Day 2: Progressive Muscle Relaxation Guided Meditation (Releasing Tension)

Day 3: Mindfulness in Daily Activities (Cultivating Presence)

Day 4: Loving Kindness Guided Meditation (Fostering Compassion)

Day 5: Guided Gratitude Meditation (Cultivating Gratitude)

Day 6: 5 Senses Guided Meditation (Mind-Body Harmony)

Day 7: Reflection Worksheet and Journaling (Consolidating Insights)

Week 2: Deepening Practice

Day 8: Release Surrender Guided Meditation (Letting Go of Control)

Day 9: Mindfulness Mountain Guided Meditation (Stability and Perspective)

Day 10: Self Inquiry and Self Awareness Guided Meditation (Deepening Self-Knowledge)

Day 11: Progressive Muscle Relaxation Guided Meditation (Enhancing Body Awareness)

Day 12: Loving Kindness Guided Meditation (Expanding Empathy)

Day 13: Guided Gratitude Meditation (Acknowledging Abundance)

Day 14: Reflection Worksheet and Journaling (Personal Growth)

Week 3: Focus on Testosterone and Hormonal Balance

Day 15: Self Inquiry and Self Awareness Guided Meditation (Cultivating Inner Clarity)

Day 16: Release Surrender Guided Meditation (Stress Management for Hormonal Health)

Day 17: 5 Senses Guided Meditation (Engaging the Body-Mind Connection)

Day 18: Mindfulness Mountain Guided Meditation (Elevating Perspective for Hormonal Balance)

Day 19: Guided Gratitude Meditation (Thankfulness)

Day 20: Progressive Muscle Relaxation Guided Meditation (Reducing Cortisol Levels)

Day 21: Final Reflection, Journaling, and Setting Future Goals (Personal Wellness Plan)

NAMASTE!
