- 

# **Key Lessons From This Presentation**

**Supplements are not magic pills.**

**Supplements support the foundation.**

**Muscle is the organ of longevity.**

**Recovery becomes more important after 40.**

**Testosterone optimization starts with health.**

**Sleep is the ultimate anabolic weapon.**

**Consistency beats perfection.**

**Most men are nutrient deficient.**

**Prevention is easier than correction.**

**The right supplements make healthy aging easier.**

---

## **Quote From This Presentation**

"You can be in the best shape and health of your life in your 40s, 50s, 60s, 70s and beyond. Supplements won't do the work for you, but they can make the journey a whole lot easier when the foundation is in place."

---

## **Final Takeaway**

The biggest message from this presentation is simple:

**Health after 40 is no longer accidental.**

It requires intentional action.

Training.

Nutrition.

Recovery.

Sleep.

And strategic supplementation.

The men who thrive in their 40s, 50s, 60s, and beyond are the men who build a strong foundation and consistently support their bodies with the nutrients they need to perform, recover, and age powerfully.

As Funk says:
